SUBJECT: Defense and Space Paper

25X1

Agency views forwarded to the NSC after the Defense and Space Interagency Group completed its work on the paper entitled "Deployment for Space-based OPP ABM Systems and Components" reveal that most agencies had not had sufficient time to sharpen options, build consensus, and consider how to apply the analysis of the paper to specific options.

25X1

Therefore, in order to frame U.S. options for decision, and without reopening the original paper, the Defense and Space IG, is requested to prepare a decision paper on options for SDI activities in space that would not constitute deployment. The paper should contain agency views both on what option should be adopted and how it should be implemented, taking into account all relevant military, intelligence, diplomatic, and legal issues. The decision paper should be forwarded to the NSC by May 2, 1988.
